NEW BUSINESS

DISCUSSION ITEMS

1) UC Programming Updates

Alejandro: Review of UC Programming dates and programs. Sandwich boards, table tents, commode chronicles will be used to market the The New Rules of Dating event. Using Return on Investment and SWAT analysis to assess these programs.

Kimberly: Office of Sustainability is working to put on more workshops. Things like learning to sew, building bee hotels, and bird houses. We want to use the space at the demonstration house.

Ray: Through Clyde's Cupboard, we have started Mountain Lion meals. It starts next week - they fill out a form. Then we can say you get one meal on us. Push from Carlos Garics because he is aware of the food insecurities around college campuses. 20 meals a week for students - first come first serve.

Stephen: Is there a rollover from week to week?

Ray: Not right now, we are just focusing on 20 per week. We are curious to see how much it will be utilized this semester.

Stephen: Rumor has it there is a fridge going in for Clyde's Cupboard?

Ray: We hope to get a fridge, we are getting help from GAF, to serve fresh fruits and fresh vegetables one day a week.

Stephen: Student Government elections are coming up. Elections are the week of Pi Day in March. I am also working with SGA to have a dessert table during the mid-terms. Stressed? Dessert on us!

I encourage tabling use in the UC - student organizations and departments.

Chad: We are working around a marketing campaign to promote shows at the ENT Performing Arts Center to students. Free or \$5 for certain events. UC supports the Mountain Lion One ENT card. We might be getting new software - looking at different companies. We want to market the card as your gateway to campus. We want to market to students the importance of the ID card and all the things it gets you. If people are not going to shows, then this deal might not be available in the future.

Ray: With this art pass extend out to faculty and staff?

Chad: Not yet.

Alejandro: How about the stand alone ID office?

Chad: The only revenue we generate is the \$25 from the student to support the software and the purchasing of the card. To fund a stand alone office, we need vendor's to buy in so that students can then go use their Clyde's Cash at their establishments. The whole idea is to bring more value to the the student ID.

2) Café 65 Update

Chad: Yesterday, we did complete contracting with a design group -Tremmel Design Group. We have worked with them in the past. Last fall, we talked about having a feedback session - shaping up to be next Wednesday. We plan to move really quickly to try and get this done by the end of the summer. Then the following week, where some of us will meet and speak with the designers. The designers will do what they do and hopefully by March we would have a design. Then get a contractor on board no later than June. Two feedback sessions will be next week 11-12:30pm, 2-3pm, UC 303. Informal drop in type sessions. Written and talking feedback.

3) Committees

4) University Center utilization

Stephen: There is a push from Chancellor Reddy to move the Career and Development Center to the Student Life space. Some staff, faculty and administration have expressed that this is not a good move. The one group that he listens to is the students. I am trying to talk to students and would ask the Darius and Irina to do the same.

Chad: I want to provide some context - there is a big push by Chancellor Reddy to move the Career Center to a more central location because our students are getting career ready in their senior. He would like this to happen earlier in their careers so would like to have the Student Life space to be more visible to students. This is an idea, not a plan.

Irina: Where does Student Life move to?

Chad: Other opportunities around campus or somewhere else in the University Center. OIT is looking to move potentially across the street to University Park. I would push to keep Student Life in the University Center. It is critical that Event Services and Student Life are in the same space.

- 5) Student Surveys
 - a. What would you like to see
 - b. Possible rearrangement of UC entities
